

Personal Portfolio Website Plan

Your Name: William Scott

Ideas for your website

Determine how you will use your personal portfolio website to showcase your skills.

Idea 1:

Responsive Webpages using CSS and frameworks like jQuery and Bootstrap.

Idea 2:

Add projects I've done previously like <http://demo.menus.click/>

I'd like to link a Unity WebGL Game I have made.

Idea 3:

Talk about skills I have learned like VMWare esxi and

Idea 4:

Talk about some of my hobbies like table top games, video games, and other. The "about me" page.

Idea 5:

Talk about the jobs I have worked, and my family business.

I work at Code Ninjas as a coding instructor. (I've taught web dev lol)

My family owns a web hosting company www.tier3consulting.com

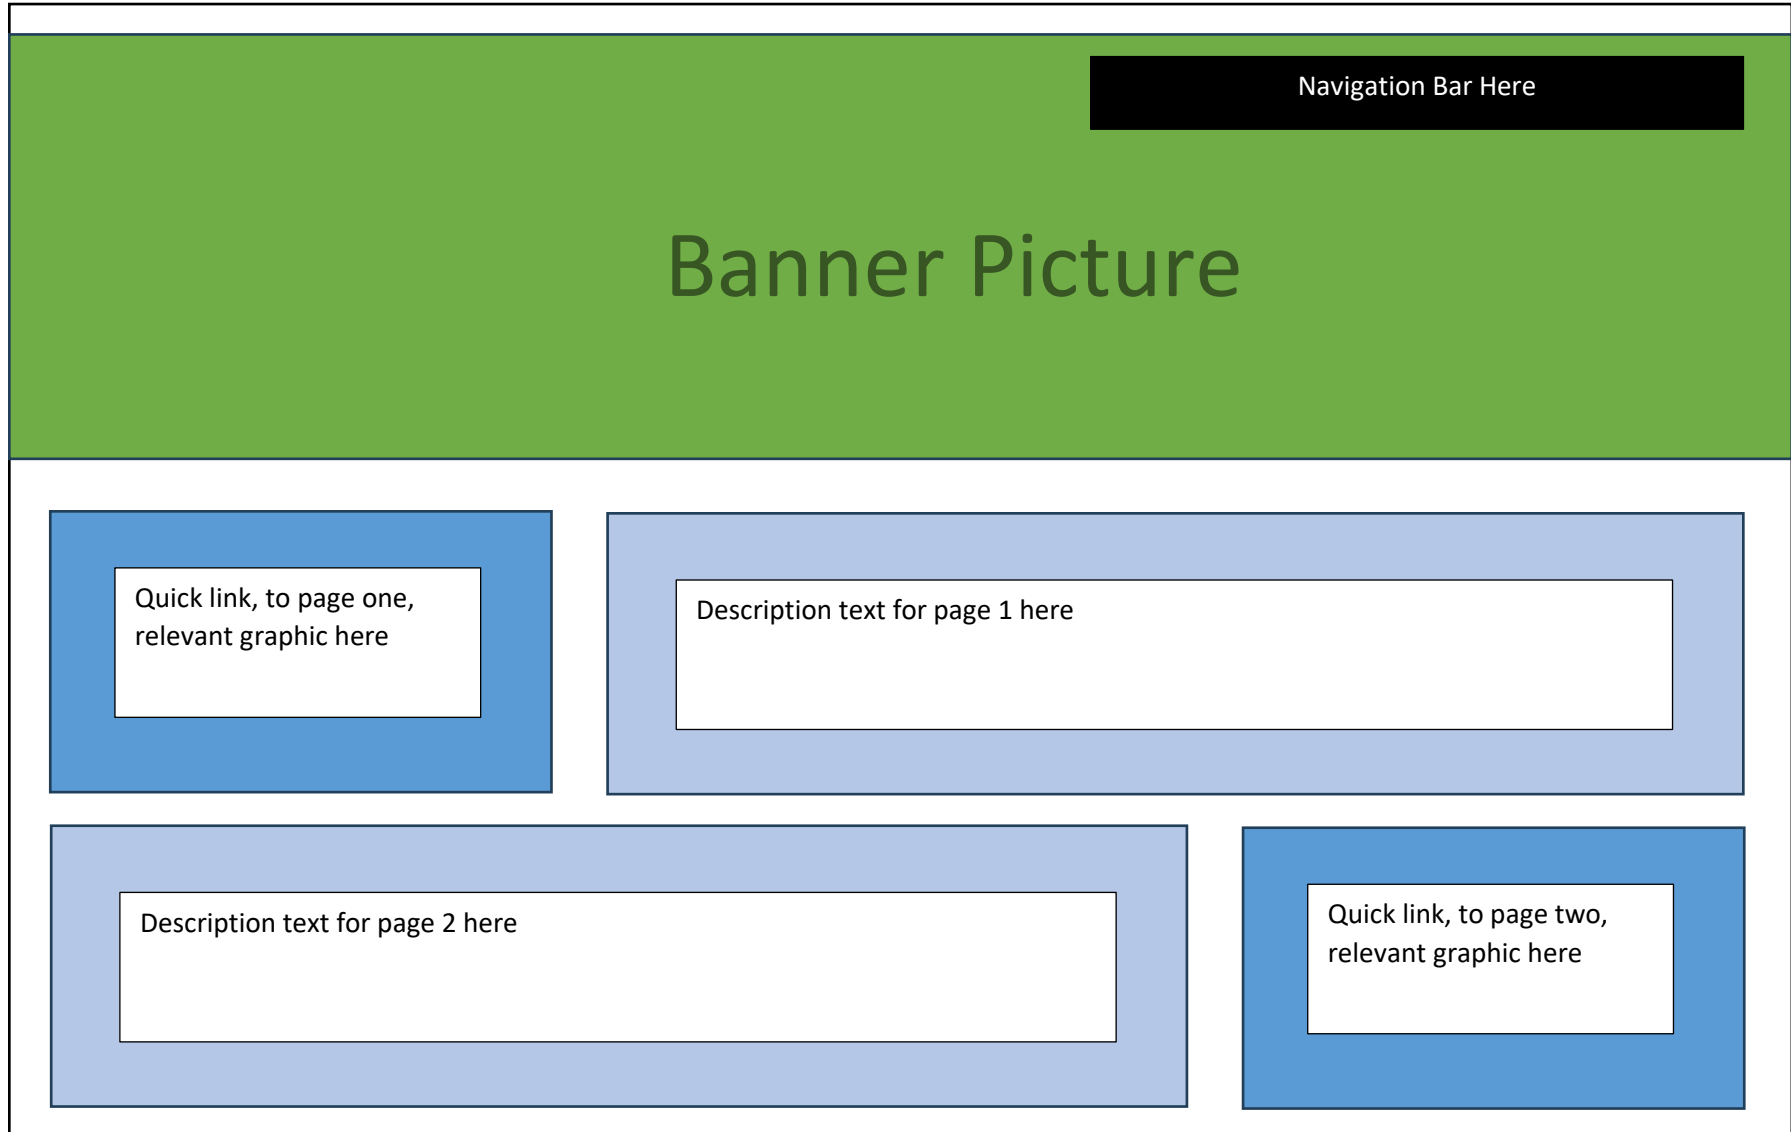

Website Plan

Topic	Questions	Answers
Purpose of Website	What is the purpose and goal of the website?	Portfolio. Breakdown what I've done. Be able to put it on a resume.
Target Audience	Describe the target audience (age, gender, demographics)	Employers
Graphics	What graphics will you use on the website?	Nature themes. I would like it to match tier3 because our website looks nice. Potentially some graphics about the things I'm interested in.
Color	What colors will you use within the site to enhance the purpose and brand?	I had a fun idea about having the general theme change per page. Not drastically but a color shift could be fun.
Accessibility	How will the website accommodate people with disabilities?	Responsive design. (You said not to worry about a JS Framework, but they make life easier.
Project Timeline	Identify the project timeline	I'll try to work on one page a week. The structure of the website is easy to setup, and I will probably have that done early. The content is the difficult part.

Here is the GitHub Link, I set it up last week: <https://github.com/Scottww00/CIS311>

Wireframe

Sketch the wireframe for your home page below.

Site map

Create a site map for the website below.
